NYAYAVAANI: 1-PAGE SOLUTION PITCH

AI Vernacular Telephonic Emergency FIR & Legal First-Responder for Bharat

Great Indian AI Internship Challenge | Team: Bollareddy Pranoy Raj & Teammate

1. THE REAL-WORLD CRISIS

Over **95% of citizens in Tier-2/3 towns and rural India** face severe barriers when reporting crimes, extortion, or the rampant surge of *Digital Arrest* and *UPI phishing* scams. In distress, citizens call from noisy streets/farmland over compressed 8kHz phone lines, speaking frantically in code-mixed vernaculars (Hinglish, Telugu). Furthermore, with the transition from IPC to the new **Bharatiya Nyaya Sanhita (BNS 2023)**, neither citizens nor desk officers know the exact legal sections, causing catastrophic loss of the 2-hour financial "Golden Hour".

2. THE SOLUTION: NYAYAVAANI

NyayaVaani turns any standard cellular/landline phone into a 24x7 intelligent, empathetic first-responder:
• **Prisma v3.0 STT:** Transcribes code-mixed telephonic audio in real-time, handling extreme background noise.
• **Evon 30B LLM:** Conducts empathy triage, extracts the 5 Ws, and performs automated statutory mapping under BNS 2023 (Sec 308, 318, 319) and IT Act Sec 66D.
• **Timbre v3.0 TTS:** Reassures callers in their native dialect with soothing audio cadence ().
• **BNSS Form 154 Bilingual FIR:** Auto-generates official, stamped complaint dossiers for police dispatch.

3. GNANI AI MODEL STACK INTEGRATION MATRIX

Layer	Gnani Model	Technical Advantage Exploited
Speech-to-Text	**Prisma v3.0**	8kHz narrowband mobile noise robustness + indic-auto code-mixing.
Reasoning Core	**Evon 30B**	Deep comprehension of Indian judicial context & BNS 2023 mapping.
Voice Synthesis	**Timbre v3.0**	Low-latency regional voice personas (Nalini, Kavya) with empathetic tags.

• **Democratizing Legal Protection:** Provides instant legal representation to 1.4 billion citizens in their mother tongue.
• **Golden Hour Asset Recovery:** Issues immediate bank freeze notices to recover defrauded funds before account siphon.
